Mr. Franklin G. Fleete Administrator General Services Administration Washington 25, D. C.

1 - DD/S subject

Dear Mr. Floete:

I spoke to you several days ago about an "Agreement Between the Central Intelligence Agency and the General Services Administration" having to do with the construction of a new headquarters building for the Central Intelligence Agency which Mr. Heasure and I entered into just prior to the ammouncement of your appointment as Administrator of General Services.

The National Capital Flanning Commission has approved of a site near Langley, Virginia, for this building, and we received the Commission's final report on 2 March 1956, a copy of which I am ferwarding herewith. We are, therefore, now in a position to proceed with our planning and I should appreciate an opportunity to discuss this matter with you at your earliest convenience.

## Sincerely,

## Allen W. Dulles Director

3 FEB 1956

The Economists Edward F. Mansure Administrator General Services Administration Washington 25, D. C.

Dear Mr. Mansure:

I greatly appreciate your letter of February 1 forwarding the Agreement which had been negotiated for the construction of the Central Intelligence Agency headquarters building. Prior to the receipt of your letter, I had sent a copy of the Agreement to the Department of Justice to make sure that there was no objection by he Department to its terms. As you so doubt know, Counsel for the Department had some thoughts concerning the Agreement which have been released by Counsel for our respective agencies. They have recest the Agreement in the form enclosed herewith and to which I understand there is no legal objection. It sets forth substantially the same arrangement and is one which I am sure can be carried out to the satisfaction of a licenservand. I greatly regret that the pressure of events did not purmit consideration of these changes before your letter, but I feel it is necessary that we accept the guidance of the Department on Justice.

بكسامته

With respect to the selection of the firm of Harrison & Abram vituals the architect-engineer for the Central Intelligence Agency building should it become necessary or in the best interests of the project to obtain additional architect-engineer services, it is understood that the General Services Administration may engage them subject to Central Intelligence Agency approval. In any event, I understand that it is agreeable to you that final architectural responsibility will rest in Mr. Wallace K. Harrison.

In a project of this magnitude it will be only natural that there will be differences of opinion from time to time, but I am same that any which have natorial significance will be referred to you and make our respective subordinates and we can then consider their resolution tegether.

I have signed the reverted agreement and trust that you will feel free to execute the duplicate originals and return one for our files.
